STEEL FRAME HOUSING/POLAND

Krzysztof and Beyata launch their Light gauge framing and quick-built housing services company for the builders and contractors of Poland. Working with a net work of several structural engineers Krzysztof and Beyata are offering for the Polish contractors a better way to produce safe and efficient designs for commercial and residential structures with light gauge steel framing.

If you are a builder of residential or commercial buildings Krzysztof and Beyata's are the two professionals who can offer the latest technical information, tips, and suggestions for your upcoming project.

Steel Frame Housing/Poland presently operates out of Georgia in USA and planning to open their offices in Poland in very near future.

To help you implement the light gauge steel framing technology on your next building project, call Krzysztof or Beyata or e-mail them at kbielicki@steelframehousing.org . They can also be reached via their Atlanta office at 678-382-0335.

For more information on the Light Gauge Steel Frame Housing in Poland call us. We can help you plan your project.
