LIGHT GAUGE STEEL FRAME HOUSING TECHNOLOGY IN GREECE.

Steel Frame Housing/Greece offers a complete and diverse line of steel frame services and products both for residential and commercial projects. Company is owned and managed by Makis Kapetanis and Victoria Gundunas.

The team has plans to have their first steel frame project in Athens and operate out of the same building until they decide to open additional locations.

Makis and Victoria offer a wide range of economical and easy built steel framed applications. Along with light gauge steel frame products, company will offer steel frame engineering services, construction services, training for the workers of their contractor customers, and complete building packages.

The quality of the galvanized light gauge steel components, special ties and a rich variety of specialty parts used in framing systems are manufactured by Dietrich Framing Industries; world's largest light gauge framing manufacturer with 36 locations with 26 plants.
