

THE ULTIMATE GREEN PRODUCT: COMPOSITE DECKING FROM RECYCLED WOOD AND PREMIUM POLYMER RESIN

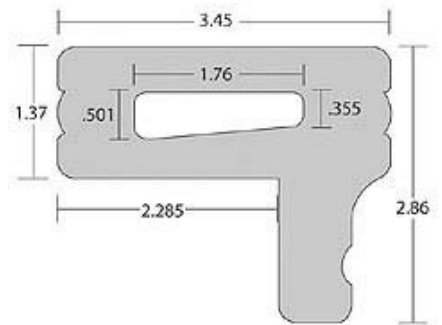

Balusters: 2" x 2"-32" balusters have a uniform matte finish to match the handrail.

Decking: Veranda decking comes in the standard size of 5/4" x 6" and is available in lengths of 8', 12', and 16'. Veranda decking is available in gray, cedar, and redwood colors.

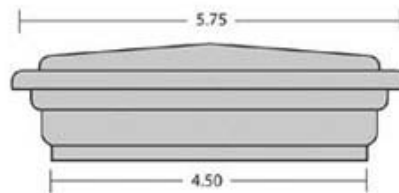

Handrails: Stylish, new universal handrail with uniform molded matte finish, reversible to use as top or bottom rail of railing system. The handrail is available in 8' lengths.

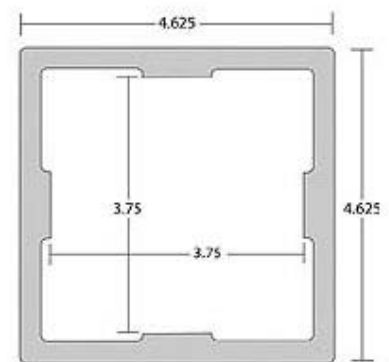

Hardware Kits: Hardware Kits for In-Line Rail and Stair Rail includes enough color coordinated brackets and screws to build one handrail section.

Post Caps: Veranda post caps slide over the top of the post sleeve and are secured with construction adhesive.

Post Sleeves: 4" x 4"-42" post sleeves are molded on all four sides with the same attractive matte finish as the handrail and baluster.

Attractive, Worry-Free Railings.

Never splits, cracks, twists, warps or rots. Never needs sanding, painting, staining or weatherproofing. Easy installation. Unlimited design applications.

As American Steel Frame Housing's preferred decking product, long-lasting, low-maintenance **GREEN DECKING** offers the beauty of wood without the drawbacks. Even though it looks and installs as easy as like wood, Veranda resists warping, rotting and damage from weather or insect attack. That's because we our manufacturer makes **GREEN DECKING** from a composite of recycled wood fiber and patented glues—a combination that offers the best of both materials. The special glues protect the wood from insect and moisture damage, while the wood protects the special glues from UV damage and adds stability and traction. Because **GREEN DECKING** is so sturdy, we **GUARANTEE** that it will last for 15 years after purchase—with only low maintenance.

GREEN DECKING
